FAST JET

IMMERSION PROTECTION GARMENT

Waterproof outer layer

Our fast jet Immersion Protection Garment is qualified for use on front line and training aircraft and is designed to integrate with thermal base layer garments, the flight jacket and anti-G garment to enhance safety and survivability during all over water operations.

BENEFITS

- ⦿ Compatible with all ejection seat equipped aircraft
- ⦿ Lightweight and breathable tri-laminate fabric for maximum comfort and protection
- ⦿ Inherently flame retardant
- ⦿ Enhanced neck and wrist seals to prevent water ingress and provide wind blast and additional flame protection
- ⦿ Garment can be donned in under 60 seconds
- ⦿ 24 standard sizes plus special measure option for optimum fit
- ⦿ Integrated sock available in 11 sizes plus special measure
- ⦿ Extended vertical urination slide fastener for ease of use

“Ultimate protection for over water missions”
