LEG-RAFT SINGLE SEAT LIFERAFT

Compact protection in a sea survival situation

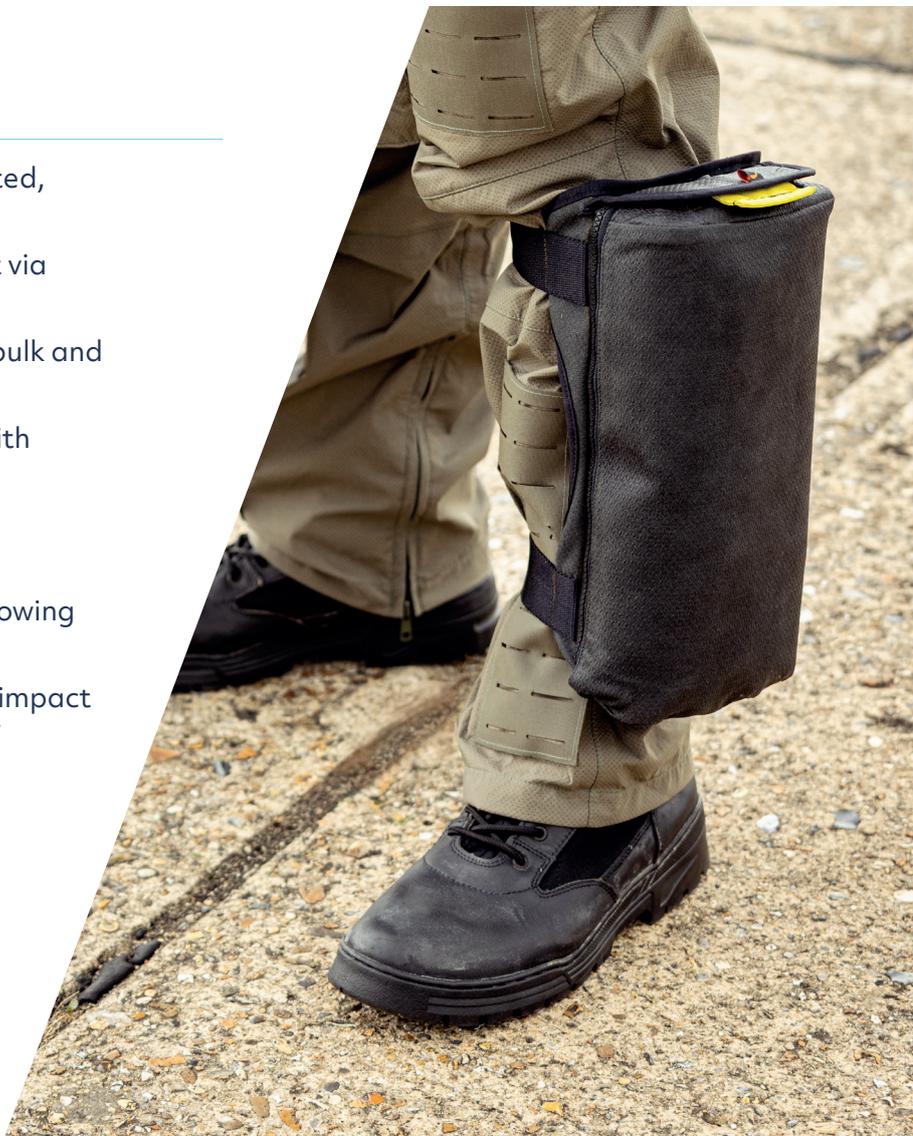

Utilising our certified Aerolite One Single Seat Liferaft (SSLR), we innovated a new concept in liferaft stowage solutions to meet increasing customer demands. Our Leg Mounted SSLR combats your storage restraint restrictions while maintaining the highest safety standards.

BENEFITS

- ⦿ Proven reliability - Utilising the tried, tested, and certified Aerolite One
- ⦿ Ease of donning, doffing and adjustment via quick-release "Cobra®" buckles
- ⦿ Vacuum packed and sealed to minimise bulk and provide extended service intervals
- ⦿ Tactile quick-release operating handle with a two-stage inflation process preventing unintended operation
- ⦿ Fire retardant and ruggedised design
- ⦿ Integral retention line to prevent loss following inflation
- ⦿ Minimised size and weight to reduce the impact on human integration and mission safety

“An optimised cross platform survival solution when facing constrained stowage space”

LEG-RAFT SINGLE SEAT LIFERAFT

TECHNICAL DATA

LEG-RAFT SINGLE SEAT LIFERAFT

Pockets	Stabilising water pockets and user deployable sea anchor/drogue
Weight	2.6kg / 5.7lbs (including low profile inflation system)
Packed Volume (approx.)	265in ³ (including low profile inflation system)
Buoyancy	Main buoyancy filled by twin CO2 cylinders, oral tube for topping up
Service Interval	Subject to storage conditions, inflator type and packing configuration, ask for more details
Packed Size	Length: 340mm / 13.18in - Width 160mm / 6.29in - Depth: 80mm / 3.14in (all dimensions approx.)
