MK28WB

PASSENGER LIFEJACKET

Helicopter and fixed wing

The Mk28 Passenger Life Preserver was designed in conjunction with major aviation operators and approval authorities specifically to meet passenger requirements. The lifejacket offers proven performance in extreme operating conditions and has a reputation for comfort, performance and unrivalled longevity.

The ultra slim Mk28 WB Life Preserver is qualified to a number of industry standards including the Civil Aviation Authority (CAA) and the Federal Aviation Administration (FAA) and is suitable for use in both rotary-wing and fixed-wing aircraft.

BENEFITS

- ⦿ Lightweight construction, with a total weight of 1Kg
- ⦿ Unobtrusive design, consisting of an adjustable waist belt and slim inflatable stole
- ⦿ Offers 170NB of buoyancy
- ⦿ Tested and approved to international civilian aviation standards
- ⦿ Suitable for both rotary and fixed wing aircraft

“ For maximum crew safety and protection ”
